

## **HIGHEST PRAISE FOR THE PARASOUND JC 1**

The December, 2009 issue of *Stereophile* includes their 'Best Products of 2009' feature.

The JC 1 was the first runner-up for Amplification Component of the Year.

Only a \$15,000 Ayre preamp received more votes.

***Stereophile* calls it "...our first runner-up, the magnificent Parasound Halo JC 1 monoblock."**

The JC 1 won more votes among *Stereophile* reviewers than any of these:

- Boulder amp
- Pass amp
- conrad-johnson preamp
- Sim Moon amp
- VTL amp
- Nagra phono preamp

This is an honor without precedent because the JC 1 has been on the market since February, 2003 – *nearly 7 years*.

Please consider this:

**1. No other component has remained a *Stereophile* Class A rated component this long; virtually all drop off after a few years, replaced by newer, more exciting brands and models.**

**2. No other component that's been selling for nearly 7 years has ever been a runner-up (much less, first runner-up) for Product of the Year.**
